Profile

I am keen driven individual on the path to becoming the best developer I can be. Equally capable on either front end or back end development. I don't want to limit myself to web based technologies so I'm particularly interested in newer trends in the industry such as machine learning, IOT and the potential value they offer. I'm always looking for new challenges in my life to overcome. My long term goal is to attain the skill level of a technical lead and transition to entrepreneurial ventures.

Experience

2019/9 - Present Inexis Consulting

Trainee Software Engineer, Nugegoda
Completed 5 month training program with excellent mentor-ship and sample projects (ASP.Net Core)
Exposed to Sprint Based Workflow
Wrote Unit, Integration, Automation Tests
Familiarized with version control strategy
Did Integration with AWS services
Extensive R&D on technologies for upcoming projects

Education

2006 - 2019

S. Thomas' College
